Reinaldo Pino

Software Developer

I am a passionate, solutions-driven software developer with more than three years' experience in both full-stack development and quality assurance. Fluent in both English and Spanish, I thrive in diverse, collaborative environments and enjoy using technology to solve real-world problems. With a strong commitment to continuous learning, I bring both technical expertise and a people-centered approach to every project I take on.

WORK EXPERIENCE

Software Developer
WiLoan

07/2025 - 01/2025 — *Port of Spain, Trinidad*
Remote Position

- Re-architected and rebuilt the company's core backend infrastructure using Laravel , significantly improving scalability, reliability, and long-term maintainability.
- Led end-to-end UI and UX enhancements across the platform, including the React web dashboard and Flutter mobile application, delivering a more intuitive and consistent user experience.
- Ensured seamless integration between backend services, web, and mobile applications, strengthening overall system performance and platform cohesion.

Contact of Reference: Lyron Marlow - +1-868-681-8811

Software Developer
Enterprise by Island Routes

07/2025 - 01/2026 — *Montego Bay, Jamaica*
In Person Position

- Led a focused UI and UX overhaul of the employee portal within an existing C# / ASP.NET HR system, improving usability and day-to-day employee interactions.
- Designed and delivered a full-stack Resmark integration for the accounts department using React (frontend) , ASP.NET (backend) , and SQL , streamlining payment-related workflows.
- Replaced and upgraded ASP.NET–based payment gateways for ATL Automotive and ATL Commercial , successfully migrating to PowerTranz to improve transaction reliability and security.

Contact of Reference: Roghe Deokoro - +1-876-527-4188

Quality Assurance Engineer
Shift Left Limited/ Sagicor Financial Corporation

01/2024 - 04/2025 — *Kingston, Jamaica*
Remote Position

- Conducted manual testing of the new IPO portal to ensure functionality, performance, and security.
- Designed, documented, and executed comprehensive test cases using Jira for defect tracking and project management.
- Collaborated with developers and QA team to support automation efforts and streamline regression testing.

Contact of Reference: Mr. Javain Burke - +1-876-379-0627

Software Developer
Arlington Financial

11/2023 - 10/2024 — *United States of America, Florida*
Remote Position

- Led the refactoring of the backend system using Node.js, improving code maintainability and performance.
- Designed and implemented version 2.0.0 of the company's API, enhancing scalability and integration capabilities.
- Worked closely with product stakeholders to align backend development with evolving business requirements.
