

Reinaldo Pino

Software Developer

reinaldopino4@gmail.com • +1-876-390-4181 • reinaldopino.com • linkedin.com/in/reinaldo-pino-352350190

Passionate, solutions-driven software developer with more than five years' experience in both full-stack development and quality assurance. Fluent in both English and Spanish, I thrive in diverse, collaborative environments and enjoy using technology to solve real-world problems. With a strong commitment to continuous learning, I bring both technical expertise and a people-centered approach to every project I take on.

SKILLS

Languages: Java, Python, C, JavaScript, C# / ASP.NET

Frameworks & Libraries: Flutter, React, Vue, Node.js, Laravel, Spring Boot

Tools & Testing: Cypress, PowerTranz, PostgreSQL, SQL, Jira, Git

Concepts & Domain: System Design, System Architecture, UI/UX Development, Loan Finances

WORK EXPERIENCE

Software Developer — Enterprise by Island Routes

07/2026 – Present | Montego Bay, Jamaica | Remote Contract Position

- Contributing to the development of enterprise HR software, building out new modules and features that support core employee and workforce management functions.
- Delivering feature enhancements and workflow improvements across an HRIS platform, translating business requirements into functional, well-structured solutions.
- Collaborating within an agile, ticket-based delivery process, managing code through version control and sandbox environments while meeting acceptance criteria in regular cross-team reviews.

Reference: Roghe Deokoro — +1-876-527-4188

Software Developer — WiPay Business Solutions Limited

03/2026 – Present | Port of Spain, Trinidad | Remote Position

- Analyzed system architecture and legacy components across the Vue.js / Node.js codebase to identify modernization opportunities, proposing updated solutions in Flutter, React, and Python to improve scalability and maintainability.
- Mapped end-to-end manual business processes, translating undocumented workflows into clear technical specifications for Flutter cross-platform interfaces and Node.js / Python services backed by PostgreSQL, streamlining and automating operations.
- Evaluated incoming requirements and designed modernized implementations in Flutter, TypeScript, and Python, bridging manual operations with software-driven, cross-platform (mobile, web, desktop) solutions.

Reference: Lyron Marlow — +1-876-681-8811

Software Developer — WiLoan

07/2025 – 02/2026 | Port of Spain, Trinidad | Remote Contract Position

- Re-architected and rebuilt the company's core backend infrastructure using Laravel, significantly improving scalability, reliability, and long-term maintainability.
- Led end-to-end UI and UX enhancements across the platform, including the React web dashboard and Flutter mobile application, delivering a more intuitive and consistent user experience.
- Ensured seamless integration between backend services, web, and mobile applications, strengthening overall system performance and platform cohesion.

Reference: Lyron Marlow — +1-868-681-8811

Software Developer — Enterprise by Island Routes

07/2025 – 01/2026 | Montego Bay, Jamaica | In Person Position

- Led a focused UI and UX overhaul of the employee portal within an existing C# / ASP.NET HR system, improving usability and day-to-day employee interactions.
- Designed and delivered a full-stack Resmark integration for the accounts department using React (frontend), ASP.NET (backend), and SQL, streamlining payment-related workflows.
- Replaced and upgraded ASP.NET-based payment gateways for ATL Automotive and ATL Commercial, successfully migrating to PowerTranz to improve transaction reliability and security.

Reference: Roghe Deokoro — +1-876-527-4188

Quality Assurance Engineer — Shift Left Limited / Sagicor Financial Corporation

01/2024 – 04/2025 | Kingston, Jamaica | Hybrid Position

- Conducted manual testing of the new IPO portal to ensure functionality, performance, and security.
- Designed, documented, and executed comprehensive test cases using Jira for defect tracking and project management.
- Collaborated with developers and QA team to support automation efforts and streamline regression testing.

Reference: Mr. Javain Burke — +1-876-379-0627

Software Developer — Arlington Financial

11/2023 – 10/2024 | United States of America, Florida | Remote Position

- Led the refactoring of the backend system using Node.js, improving code maintainability and performance.
- Designed and implemented version 2.0.0 of the company's API, enhancing scalability and integration capabilities.
- Worked closely with product stakeholders to align backend development with evolving business requirements.

Reference: Mr. Justin Yapp — +1-386-871-9306

Software Developer — Shift Left Limited / National Commercial Bank of Jamaica

12/2021 – 10/2023 | Kingston, Jamaica | Hybrid Position

- Developed full-stack features for the Credit Card Web Portal using React (frontend) and Java Spring Boot (backend).
- Assisted in developing systems to handle customer inputs for the online banking platform, improving turnaround time and user experience.
- Collaborated in Agile teams to deliver secure, user-focused business application solutions.

Reference: Mr. Javain Burke — +1-876-379-0627

Programming Teacher — STEAM House

09/2021 – Present | Kingston, Jamaica | Remote Position

- Instructed students aged 12–18 in Python, introducing core programming principles and logical thinking.
- Delivered advanced programming courses in Java and JavaScript, tailored to student aptitude levels.
- Promoted creativity and innovation in programming through hands-on projects and interactive learning methods.

Reference: Ms. Godiva Golding — +1-876-253-8813

PERSONAL PROJECTS

Detention & Demurrage

10/2025 – Present

- Designed and built a centralized system to manage detention and demurrage operations for shipping containers, covering end-to-end workflows from tracking to settlement.
- Implemented role-based functionality for clients and agents, enabling container tracking, charge calculations, dispute handling, and operational management within a single platform.
- Developed secure payment handling for detention and demurrage fees, integrating billing and payment workflows to support accurate, timely financial transactions.

EDUCATION

Bachelors in Computer Science — University of Technology, Jamaica

09/2018 – 08/2021

LANGUAGES

English (Native / Fluent) • Spanish (Advanced) • French (Basic)

HONORS

1st Place — Sagicor Innovation Challenge (06/2021), Sagicor Group Jamaica

1st Place — IEEE Innovation Challenge (2021), Institute of Electrical and Electronics Engineers
